ABOUT US

Since 1995, at Das Superfoods, driven by a profound love for peanuts, we meticulously cultivated the finest peanuts, drawing upon India's rich heritage. Our journey uncovered a gap - the absence of premium, locally-produced peanut butter.

In 2012, we inaugurated our first state-of-the-art manufacturing plant in Gujarat, India. Starting with 8 tons per day, we have scaled up to 75 tons daily through dedicated work, marking the beginning of our quest to redefine India's peanut butter landscape. It was then that we introduced India's PINTOLA[®], revolutionizing the category of peanut butter.

As the top choice for Private Label Clients, exporting to over 40 countries, we manufacture the largest range of Nut Butters, specializing in unique recipes and timely delivery.

IT'S NOT JUST Grinding The Peanuts!

The finest and consistently sized G20 bold peanuts are perfectly roasted using continuous roasting technology, then ground to perfection in the world's best milling machine for extra creaminess. Our peanut butter is a masterpiece of flavor and quality.

Every batch undergoes rigorous testing in our laboratory to ensure it exceeds the quality standards of every country. We test peanuts both before and after production to ensure that Aflatoxin levels are well below the required limits. Experience the artistry of peanut butter with us, where each jar is a testament to our expertise in delivering only the best.
